Spring APPAREL Exhibit

Come in and see the New Fashions for Spring - They're Lovely, so much color, such styles -- but you must see the new goods to fully appreciate how lovely they are

The New Spring Frocks Show Clever Effects

Puffed sleeves may be short or long. Jackets are sleeveless or long sleeves and shown in many styles. Bright colors are everywhere, plain Crepes, flower Prints and Tricolor. Higher waist lines, longer skirts, finer materials. Sizes 14 to 46.

Separate Skirts \$2.95

New smartly tailored skirts. Navy and brown flecked Wool Crepes. Made with snug fitting hips and flared bottoms. Sizes 14 to 20.

Knitted Suits

For all Sports wear, knitted suits are favored. Their soft, all wool yarns makes them warm and smart for all outdoor occasions. Their light weight makes them equally suitable for indoors wear.

Hats For Easter

Copies of imported French models. Smart ready-to-wear styles. The popular Spring braids are all represented in becoming, youthful shapes.

Kayser Hose—\$1.00, \$1.25, \$1.50, \$1.95

Hose of sheer beauty, in dull Chiffons. Medium and service weight Silks. Silk from top to toe or with lisle garter top and cradle foot. New shades.

Spring Shoes \$5.50 to \$7.50

Shapes and widths to correctly fit your feet. Slim black pumps, smart straps, ties and oxfords. Arch fitting shoes. Sizes 2 1/2 to 8 1/2, widths A to EE. Combination fittings.

Gloves For Spring 65c. to \$2.95

Imported French Kids and Capeskins in fashionable pull-on and gauntlet styles. Silks, Suede Cloth and Rayons.

Girl's Wool and Silk Tams Half Usual -- 35c.

Samples of them, just opened up. You have a splendid choice of colors in this lot.

Spring Coats \$8.95 to \$22.00

Polo flecked tweeds. Smartly tailored models or sports styles with Raglan shoulders and large lapels. Dressy, becoming styles for Girls and Women. \$8.95 to \$22.00.

Blouses For Easter

To Wear Tucked In or Out \$1.95 and \$2.25
Washable Crepes to wear with the suit or skirt. Smart types in Eggshell, Coral and Sand.

Full Fashioned Lisle Hose—Special 50c.

A lovely sheer quality that fits perfectly and gives splendid service. Ideal for home wear.

STOP Coughs & Colds

WORLD HAPPENINGS BRIEFLY TOLD

Canada's investment in highways is said to total \$800,000,000, covering roads estimated at 350,000 miles in length.

Waterloo bridge is sinking and must be replaced by a new one which will cost \$1,200,000. The present bridge was opened in 1817.

A total of 21,292 persons were naturalized during the fiscal year ending March 31, 1931. Twenty-seven certificates were revoked. Those naturalized were mainly central Europeans.

Furniture and other articles recently seized by the police in Mohamand's bazaar brought \$133.22, when they were auctioned to help pay taxes on the property.

William Miller, 73, pioneer, is dead at Calgary. He attended the ceremony of driving the last spike into the Canadian Pacific Railway line at Craigellachie, B.C., in 1885.

The Citroen-Haardt-Astoria-Expedition, travelling 8,000 miles across Asia, met temperatures ranging from 120 degrees above zero to 16 degrees below.

Premier Tomin of British Columbia does not agree with the three reports tabled at Ottawa stating the Peace River outlet was not feasible at present. He supports building of the outlet.

W. F. Powell and R. M. McLeod, reading of the departure of an expedition to seek treasure on the Coconino Island, recall a similar unsuccessful expedition they took part in 45 years ago to seek the same treasure.

There will be no change in the French disarmament and reparations policy under the government headed by Andre Tardieu, the new premier told the Chamber of Deputies in his first ministerial declaration.

A bill to link Glacier National Park with Waterton Park across the Canadian border in an International Peace Park has been reported favorably by the United States House of Representatives public lands committee.

Her Majesty Queen Mary, accompanied by the Duke of York and Prince George, visited the Canadian industrial section at the British Empire Exhibition at Olympia, London, England, according to a cable received by the Department of Trade and Commerce.

Gasoline Tax

Net Revenue Shown For Saskatchewan For Year 1931

The Saskatchewan gasoline tax resulted in a net revenue of \$1,254,658.20 being received into the provincial treasury in 1931, figures made public in the legislature disclosed.

The total amount collected through the tax was \$2,458,875.29, of which \$1,148,528.59 was retained in addition to \$568,088.50 paid out by way of compensation for collection.

In addition, it was stated by Hon. A. C. Stewart, Minister of Highways, that 91,276 automobile licenses were issued in 1931, 15,878 licenses for trucks, 41 for public vehicles, 110 for freight vehicles, 506 for motorcycles, 570 for heavy vehicles, 2 for pedal bicycles with motor attachments and 1,107 for trailers.

A Good Investment

Big Business In Oriental Developed From Few Gifts

About a quarter of a century ago the Standard Oil Co. gave away without cost a large number of kerosene oil lamps and stoves in China and throughout the Orient. This was designed to increase the demand for kerosene oil. It was a good investment. Today tankships operated by the Standard Oil and the Shell Oil Companies carry many millions of gallons of kerosene to Oriental countries annually. While electric lighting is common in port towns, throughout the Orient the interior cities and towns as well as the rural districts still employ kerosene oil as their principal means of lighting.

Still Some Differences

There are still some differences between the sexes, despite the desperate efforts to eradicate them all and we never saw a man earnestly endeavoring to ascertain by a prolonged study of the outside of the envelope whom the letter came from, instead of opening it and finding out at once and for sure.

Having walls composed almost completely of glass, a New York architect has designed a round school building with a view to saving lighting expense.

W. N. U. 1931

Canadians Prefer Tea

As Hot Beverage It Takes Precedence Over Coffee

Canadians are tea drinkers. As the hot beverage of the northern half of this continent tea stands first in esteem. In the calendar year 1931, Canada imported 35,115,480 lbs. and in 1930, 30,885,870 lbs. An inconsiderable amount was exported so that the total consumption averaged about 41,000,000 a year. The import of green coffee direct from countries of origin or from bond in Great Britain in 1931 was 31,739,529 lbs. and in 1930, 30,885,870 lbs. or an average of about 30,000,000 lbs. a year without coffee. And tea goes far beyond than coffee in household use.

A feature of the Canadian trade in coffee last year was the large increase in the importation of green coffee direct from British East Africa. In 1930 it amounted to 338,181 lbs. and in 1931 it increased to 1,331,643 lbs. That, of course, is far below the figures of the importation from Brazil, Colombia and Jamaica, but it shows such a decided increase from newly settled territory that it appears to predict a great change in the near future in coffee purchasing. It is possible that some of the 2,614,778 lbs. which came from Great Britain was of African origin also.

The total green coffee imported in 1931 was 31,739,529 lbs. and of coffee and chicory 33,226,638, an increase in each case of close to 2,000,000 lbs. Amongst the many countries from which Canada obtains its coffee supply is Abyssinia. The amount from that land in 1931 was 206,465 lbs. as compared with 158,073 lbs. in 1930.

Winnipeg Newspaper Union

By Annette

There will be no change in the French disarmament and reparations policy under the government headed by Andre Tardieu, the new premier told the Chamber of Deputies in his first ministerial declaration.

A bill to link Glacier National Park with Waterton Park across the Canadian border in an International Peace Park has been reported favorably by the United States House of Representatives public lands committee.

Her Majesty Queen Mary, accompanied by the Duke of York and Prince George, visited the Canadian industrial section at the British Empire Exhibition at Olympia, London, England, according to a cable received by the Department of Trade and Commerce.

Comets and Meteors

Interesting Facts Given In Lecture By Ontario Professor

That the spectacular objects familiarly known as shooting stars are not stars at all, but minute particles of cold matter flying through space, which, coming into contact with the earth's atmosphere, glow with the heat of friction, pass away, in fact, out again into space, or fall into the earth, was a fact brought out by Dr. Kingston, professor of astronomy at the University of Western Ontario, London, Canada, in an interesting illustrated address on "Comets and Meteors." The so-called shooting stars which seem so far away and which seem to move so rapidly, are in reality only thirty, forty, maybe sixty miles away and are moving at only about thirty to sixty miles a second, not a really high rate of speed when compared with that of some of our solar bodies.

Some meteors are larger, however, and numerous examples are preserved which have fallen into the earth, weighing from a pound or so to several tons. The falling of a large meteor is believed to have caused the great crater in Arizona that is at least six hundred feet deep and nearly a mile in diameter. The greatest meteor known in modern times is that which fell in Siberia in 1908, leaving a number of craters. This fell with such terrific force and heat that forests within a radius of over twenty miles were flattened to the ground in concentric circles like so many nine pins, trees were scorched and scores of animals killed. Falling in a very isolated area, it is not known that this caused the loss of any human life, but had it fallen on a city, thousands of lives would doubtless have been snuffed out in a minute.

Dr. Kingston also spoke of comets at some length, some travelling on open orbits, which are drawn with in earthly vision by the gravitational pull of the sun, circle around the sun and then vanish again into space, probably never to return. Others, however, like Haley's comet, which was seen in 1910, travel on an orbit hundreds of millions of miles in length, but return with mathematical regularity at fixed periods, that astronomers can estimate accurately. The effect of the sun on the comets, some of which are broken up into minute particles by its power, was also discussed at length by Dr. Kingston, whose address was illustrated by a large number of slides, diagrams illustrating the orbits of comets in relation to the planetary system, and many photographs showing various noted comets and meteors.

C. N. R. Branch Lines

\$648,000 To Be Expended On Construction Work This Year

A total of \$648,000 will be expended on branch line construction for the Canadian National Railways this year, that amount being authorized in the 1929-1932 programme, according to a return tabled by R. J. Manion, Minister of Railways, in the House of Commons. A number of the branch lines are completed, but work this year will be confined to five, of which two are in Alberta, one in Saskatchewan, one each in British Columbia and Ontario. The programme follows: Bulwerk (Alberta) easterly, 115,000; Brantford (Ontario) cut-off, \$312,000; Hemaruka-Skapa (Alberta), \$115,000; St. Walburg (Saskatchewan) Bonnyville, \$35,000; Lulu Island (B.C.), \$171,000.

Expenditures in connection with the programme up to December 31, 1931, amounted to \$1,740,768. During the year the sum of \$4,578,000 was spent. The amount authorized in the schedule, plus the customary 25 per cent., totalled \$5,950,500.

A number of the constructions have been discontinued for the time being.

Architectural Institute

Officers Are Elected At Annual Meeting Held At Lucerne

Gordon M. West, of Toronto, was elected president of the Royal Architectural Institute of Canada in 1931, at the closing sessions of the 25th general annual meeting at Lucerne, Que. John Y. McCarter, Vancouver, is first vice-president. Members of the council for western provinces are: Alberta, G. H. MacDonald and R. McD. Symonds; British Columbia, S. M. Eveleigh, John Y. McCarter and Andrew L. Mercer; Saskatchewan, F. H. Portnall and W. G. Van Egmond.

Henry VIII. ordered a brilliant fireworks display for his marriage with Anne Boleyn.

Virginia has about 3,000 miles of navigable fishing waters.

Close Judicial Districts

Four judicial districts of Saskatchewan will not operate this year, as no appropriations have been provided for them by the government for the fiscal year 1932-33. They are Gravelbourg, Leader, Maple Creek, and Wynyard. In the fiscal year now closing 23 districts operated, and the closing of the four for which no appropriation is provided will mean a saving in expenditure of \$30,870.

Plymouth prison in England has been converted into a municipal laundry.

"Aren't you ashamed to try to sell a wireless set to a wire merchant?"—Fele Mele, Paris.

Of the 60 different birds that feed upon the cotton-boll weevil, scientists regard orioles and swallows as probably the most effective destroyers.

Anyone who has lived through 1931 safely ought not to be afraid of anything 1932 can do to him.

French producers of dyes supplied about 96 per cent. of the domestic demand last year.

Clean Seed For Farmers

Hon. Mr. Buckle Announces Plan For Cleaning Wheat In Alberta Area

The Honourable W. C. Buckle, Minister of Agriculture, announces plans for the cleaning of wheat supplied to farmers in the relief area of Saskatchewan. The stocks in local elevators will be distributed insofar as they are suitable for human consumption. The wheat and farmers will take the wheat home and clean it or they may arrange with custom cleaning outfits to clean it. Some of these may be operated by private individuals and some by municipal councils. An alternative is to have it cleaned by the local elevator or milling company.

The cost of cleaning the wheat is included in the price and those cleaning it themselves can claim a rebate from the Saskatchewan Relief Commission of 2 1/2 cents per bushel.

When a farmer is unable to clean it himself he will make his own arrangements for getting it cleaned and the Relief Commission will pay to the cleaner a rate not exceeding 2 1/2 cents per bushel for the quantity of wheat cleaned. The charge will be based on the quantity of uncleaned wheat (excluding commercial dockage), put through the cleaner.

The operator of the cleaning machines will be required to submit to the Relief Commission satisfactory evidence of cleaning. Proper forms for this purpose can be obtained from the local relief officer.

The Relief Commission will only accept responsibility for cleaning charges on wheat supplied by the Relief Commission.

Any cleaning for which the Relief Commission pays must be satisfactory to the Saskatchewan Department of Agriculture, whose representatives will make periodical inspections of cleaning operations as soon as the wheat is released for delivery to farmers.

Store Gas For Planes

Tractor To Be Used To Establish Caches For Aeroplanes Operating In North

A caterpillar tractor swing to establish caches of gasoline for use of aeroplanes flying into the Great Bear Lake country will leave Prince Albert in a few days to make its way over frozen muskegs, rivers and lakes of the west's hinterland to Fort Rae, 400 miles south of the new mineral field. The "swings" route will be via the Mackenzie River, a total distance of 1,200 miles.

This transportation venture of the Brooks Airways Limited, which plans to open a fleet of planes from Prince Albert to Great Bear Lake commencing shortly, has never before been attempted. The outfit will travel light to McMurray, end of steel, where the gasoline will be picked up. On the event the destination in the northwest territories is not reached to give sufficient time for the tractor and sleighs to be brought back, they will be left at Fort Rae until next winter.

Following the "swing" departure, Mr. Brooks will try to motivate, checking the ground party's progress from the air. His business at McMurray will include the testing of the Mackenzie River ice to ascertain what care will be necessary to ensure the passage for the tractor. The "plane" trip will be made via Fort Chipewyan and Stony Lake, the latter point the destination of a recent flight to inquire into the death of the late Corporal E. B. Bursall, whose remains were flown to Prince Albert. Brooks company officials here expect that the first of the season's flying into Great Bear will be in April and March when "planes" will take in supplies with which to start the summer's work.

Need More Population

Not Sufficient People In Canada To Shoulder National Debt

Canada must have more population, W. A. Gordon, Acting Minister of Immigration, told the House of Commons. "We need more people, not more get on the positive side of immigration," he said, "if we hope to pay off the huge debt now saddling the 10,000,000 people of this country."

The Dominion's "back to the land movement" has placed 44,000 people on farms, the House was told by Mr. Gordon. They had been "taken off the unemployment shelves," removed from the cities and made independent. "That," he added, "is no mean accomplishment."

In Deference To Jews

The Shakespeare play, "Julius Caesar," has been substituted in the public schools of the province for "The Merchant of Venice," as the result of objections raised by Jewish people. Dr. J. T. M. Anderson, Premier and Minister of Education, told the Saskatchewan School Trustees' Association, when he defended the department's policy regarding text books and denied frequent changes.

Of the 60 different birds that feed upon the cotton-boll weevil, scientists regard orioles and swallows as probably the most effective destroyers.

Anyone who has lived through 1931 safely ought not to be afraid of anything 1932 can do to him.

French producers of dyes supplied about 96 per cent. of the domestic demand last year.

the previous day's conversation with Burke and Tormarin and jumbled up together, had supplied the nightmare horror of her dream.

But even so, it was many days before she could altogether shake off the disagreeable impression it had made on her.

CHAPTER XIV. A Complaint

"You don't like Jan Peterson," Burke made the announcement without preface. He and Judith were sitting together on the verandah at Willow Ferry, where their coffee had been brought them after lunch. Judith inhaled a whiff of cigarette smoke before she answered. Then, without any change of expression, her eyes fixed on the glowing tip of her cigarette, she answered composedly:

"No. Did you expect I should?"

"Well, hang all, you don't hold her accountable for her father's defection, do you?"

A dull crept up under Mrs. Craig's sallow skin, but she did not lift her eyes. They were still intent on the little red star of light dilling slowly into grey ash.

"Not accountable," she replied coolly. "I look upon her as an unpleasant consequence." She bent forward suddenly. "Do you realize that she might have been my child?" There was a quality of quality in her voice, and for an instant a rapid look came into her face, transforming its hard lines. "But she isn't. She happens to be the child of the man I loved—and another woman."

"You surely can't hate her for that?"

"Can't! You don't know much about women, Geoff. Glyn Peterson stamped on my pride, and a woman never forgets that."

She leaned back in her chair again, her face once more an indifferent mask. Burke sat silent, staring broodingly in front of him. Presently her glance flickered curiously over his face.

"Why does it matter to you whether I like her or not?" she asked, breaking the silence which had fallen. Burke shifted in his chair so that he faced her. His eyes looked far more red than brown at the moment, as though they glowed with some hot inner light.

"Because," he said deliberately, "I'm going to marry her."

Judith sat suddenly upright. "So that's the meaning of your constant pilgrimages to Staple, is it?"

"Just that."

She laughed—a disagreeable little laugh like a douche of cold water. "You're rather late in the field, aren't you?"

"You mean that Blaise Tormarin wants her?"

"Of course I do. It's evident enough, isn't it?"

Burke pulled at his pipe reflectively. "I should have thought he'd had a sickener with Nesta Freyre."

"So he had. But not in the way you mean. He never loved Nesta."

"Then why on earth did he ask her to marry him?"

"Good heavens, Geoffrey! You're a man—and you ask me that! There are heaps of men who ask women to marry them on the strength of a temporary infatuation, and then regret it ever after. Luckily for Blaise, Nesta saved him the 'ever after' part. But"—

—evidently he significantly—"Blaise's feeling for Jean isn't of the 'temporary' order, is it?"

"All the same, I don't believe he means to ask her to marry him."

"No. I don't think he does—mean to. He's probably got some high-minded scruples about not asking a second woman to make a mess of her life as a result of the Tormarin tempest. It would be just like Blaise to adopt that attitude. But he will ask her, all the same. The thing'll get too strong for him. And when he asks her, Jean will say yes."

"You may be right. I've always said you were no fool, Judy. But if it's as you think, then I must get in first, that's all. First or last, though"—

—with a grim laugh—"I'll back myself to beat Blaise Tormarin. And you've got to help me."

Followed a silence while Judith threw away the stump of her cigarette and lit another. She did not hurry over the process, but went about it slowly and deliberately, holding the flame of the match to the tip of her cigarette for quite an unnecessarily long time.

At last: "I don't mind if I do," she said slowly. "I don't think I envy—you're a very happy woman, so I don't mind assisting Glyn Peterson's daughter to the position. It would make things so charming all round if he and I ever met again"—smiling ironically.

Burke looked at her with a mixture of admiration and disgust. "What a thorough-going little beast you are, Judith," he observed tranquilly.

She shrugged her thin, supple shoulders with indifference. "I didn't make myself. Glyn Peterson had a good share in kneading the dough; why shouldn't his daughter eat the bread? And anyhow, old thing"—her whole face suddenly softening—"I should like you to have what you want—even if you wanted the moon! So you can count on me. But I don't think you'll find it all plain sailing."

"No"—sardonically. "She'll likely be a little devil to break. Well, starting being a bit more friendly, will you? Ask her to lunch."

Builds Resistance
Easy to Digest

Accordingly, a day or two later, a charming little note found its way to Staple, inviting Jean to lunch with Mrs. Craig.

"Well, it's going alone," it ran, "as Geoffrey is quite off for a day's fishing, so I hope Lady Anne will spare you to come over and keep me company for an hour or two."

Jean was delighted at this evidence that Judith was leaning towards her. She was genuinely anxious that they should become friends, feeling that it was up to her, as Glyn's daughter, to atone—in so far as friendliness and sympathy could be said to atone for her treatment of her. Beyond this, she had a vague hope that later, if she and Judith ever became intimate enough to touch on the happenings of the past, she might be able to make the latter see her father in the same light in which she herself saw him—as a charming, lovable, irresponsible child, innocent of any intention to wound, but with all a child's unregarding pursuit of a desired object, irrespective of the consequences to others.

(To Be Continued.)

Vacation Tips By Plane

But Summer Jaunt Into Far North
Now Cost Plenty

And would the latest travel hints. Summer trips into the far north during June, July and August!

And if you thought that trip to Bank cost money, just take a look at the literature issued by Canadian Airways about the summer trips arranged through the Hudson's Bay Company Transport Department.

Ouch! A little trip northbound from McMurray, Alta., to Akleivik, on the edge of the Arctic Ocean by plane and return by boat will cost you just \$350!

If you wanted to fly both ways, Canadian Airways offer you the usual rates of \$750! By air you can make the jaunt up to Akleivik from Edmonton in four days. Something like 1,500 miles, that's all that counts. The boat and plane trip would take isn't stated. But they'll knock \$30 off the \$530 if you want to go north by boat and south by plane.

Canadians Coming Back

Report Shows Movement From United States Is Heavy

Figures which have been compiled by the Immigration Department show a persistent trek of Canadians home-ward from the United States. In the past seven years the number has been 281,677, of which 254,889 were native born and the others former residents of Canada who were born outside—either British or nationalized Canadians.

In the last seven years the repatriation has been distributed as follows: 1925, 43,775; 1926, 47,221; 1927, 56,957; 1928, 59,887; 1929, 33,788; 1930, 28,830; 1931, 30,200.

So far this year the movement indicates a material increase over last year.

Financing Was Easy

How Alexander the Great financed some of his conquests is shown by Professor H. F. Lutz, of the University of California, who estimates that Alexander took booty of \$5,000,000 at the battle of Issus, over \$141,000,000 at Persepolis, and \$121,000,000 at Ecstaban.

A German firm making photographic accessories has produced a slipcase slide with a locking device, which makes double exposures impossible.

Denmark's largest co-operative society now has 1,800 branches.

**ACID STOMACH
IS DANGEROUS**

Suffers From Indigestion
CUT THIS OUT

"Stomach trouble, dyspepsia, indigestion, sourness, gas, heartburn, food refusal, etc., are all symptoms of acid stomach, in ten by chronic acid stomach," says a specialist.

Burning hydrochloric acid develops in the stomach and often leads to gastric irritation and indigestion. Do not eat acid stomach with open sores or gastric ulcers. Do not eat acid stomach with open sores or gastric ulcers. Do not eat acid stomach with open sores or gastric ulcers.

Instead, neutralize or sweeten your acid stomach after meals with a little sweetened Magnesia and not only will the pain vanish but your meals will digest naturally. There is nothing better than sweetened Magnesia to sweeten acid stomach and to soothe the inflamed lining of the stomach. Your acid stomach will be relieved in just a few minutes. Sweetened Magnesia can be obtained from any reliable druggist in solid powder or tablet form. It is not a laxative and is not at all expensive.

Search For Hidden Gold

Expedition Bound For Cocos Island
Sails From Vancouver

The adventures of a "buried treasure" was once more answered when the small motor vessel "Silver Wave" put off of Vancouver recently, carrying 24 men who held strong in their hearts the hope of uncovering the fabulous wealth reported to be buried on Cocos Island in all its forms of pieces of eight, gold bullion, and precious jewels. And behind them were perhaps thousands of others who have invested money to make the expedition possible, in the hope that perhaps the romantic story is true.

The small craft was headed first for San Pedro, California, from whence it will proceed 2,000 miles to Pacific some 400 miles southwest of Costa Rica.

Commanded by Col. J. E. Leckie, the party will try until next October to discover the secrets of the little island, and then decide whether or not they wish to renew their expedition with the Costa Rican Government. For while two other expeditions are reported to be on the same search—one from New York and the other from Liverpool, England—the Vancouver party claims absolute right to the property until October, with the option of annual renewal for a period of three years.

Three times before, expeditions have left Vancouver for Cocos, and returned fruitless, but the present party carries an instrument called the metalograph, said to possess tremendous power, and with it they hope to succeed where others have failed.

Cocos Island is described as crowned by twin peaks and walled by ramparts of unscalable rock. Mount Iglesas rises 2,900 feet, while another peak rises to 1,500 feet above sea level. It is about five miles long and a little less in width. Rainfall at certain times is so hot as to forbid work during part of the day.

**THE RHYMING
OPTIMIST**

By Aline Michale

HIS COURAGE

Not his heart untouched by any fear,
The soul that goes serene in strength and pride
Assured of triumphs waxing year on year
And wish no thought of goals to be denied.

No flags unfurled to lead him to the fray,
No pausing drums to lift his spirit high
No plaudits echoing along his way,
No bright star beckoning from a kindly sky.

For him, the valor of some secret force
Impelling him to do the thing he deems;
To follow on a dark and destined course,
To enter where the stealthy shadow spreads—

The deep insistent urge that never fails,
However much his coward spirit quails.

Distemper responds quickly to
Douglas' Egyptian Liniment. Keep a bottle handy in the stable.

Banned From Russia

Trotzky and 36 Others Forbidden For
All Time To Enter Land Of
Soviet

Leon Trotzky and 36 other Russian emigres living abroad were formally stripped of their Soviet citizenship recently and forbidden "for all time" to enter the Union of Soviet Socialist Republics. The action was taken by the preidium of the central executive committee.

In the case of Trotzky, the action was a mere formality, for he was banished permanently from the Soviet Union two years ago and sent to Istanbul, Turkey, where he since has lived as a bitter exile.

Trotzky was banished after an open split with Josef Stalin, Russia's strong man. He became a leader of the left-wingers, who preached a doctrine of world revolution as a necessity before socialism could be built in one country.

Other former Soviet citizens who fell under Sunday's ban were identified as Mensheviks or other sympathizers. Few of them were well known.

Canada's Census

Incomplete returns of the Canadian census taken last June set the population of the Dominion at about 10,360,000. Returns from isolated portions in the north held up final tabulations.

The Irish Free State and Czechoslovakia are said to be the only two countries that have the same government that were in power ten years ago.

Of the 5,000 women licensed to practice law in the United States nearly 1,000 are west of the Mississippi.

Raphael, greatest of all painters, first won his reputation as an architect.

GAined 1 lb. A WEEK

Kruschen Stopped It—
Now 11 lbs. Down

"I started to take Kruschen Salts a month ago, to reduce my weight—after trying several other ways. I am pleased with the results, as from 224 lbs. I have lost 11 lbs., which I think is a move in the right direction. I feel better all round, and am hoping to get down to 168 lbs. I am 52 years of age, and 5 feet 8 inches, and was putting on weight consistently at the rate of half-a-pound per week, so you see I have come to be thankful for Kruschen Salts."—J. W.

An over-stout person is an auto-intoxicated (or self-poisoned) person whose internal organs are failing to expel from the body the waste products of digestion. Allowed to accumulate, this waste matter is turned into layer after layer of hideous fat.

The six salts in Kruschen assist the internal organs in performing their functions properly—to throw off each day the waste and poisons that encumber the system. Then, little by little, that ugly fat—slowly, yes—slowly, and you feel so wonderfully healthy, youthful, and energetic—more so than ever before in your life!

FREE TRIAL OFFER

If you have never tried Kruschen—try it now! Send for a trial bottle—no obligation at all. Open the trial bottle first, put it in the regular bottle and you will see the difference. Kruschen does not cost much. Take it back. Your druggist is authorized to return the regular bottle as good as new. Take it back. Your druggist is authorized to return the regular bottle as good as new. Take it back. Your druggist is authorized to return the regular bottle as good as new.

Write for Kruschen Salts, at our expense, to J. W. Kruschen, Ltd., Manchester, Eng., and J. W. Kruschen, Ltd., Montreal, Que., Canada.

Cheap Land Rental

Fifty Dollars a Year Paid For
Property Worth \$7,500.00

For one of the most valuable properties in London, a rental of \$50 a year is paid. This rental has not varied for centuries. It pays for the use of the land which is built the Mansion House, the official residence of the Lord Mayor.

The site of the Mansion House is owned by the rector of the parish of St. Mary Woolnoth, in Lombard Street, with which parish is combined the parish of St. Mary Woolchurch-Haw. The Mansion House stands partly on the site of St. Mary Woolchurch, which was burned down in the Great Fire of London.

Shortly after the fire this parish was amalgamated with St. Mary Woolnoth and when the Mansion House was built at the end of the eighteenth century the city corporation agreed to pay the rector of the combined parishes the sum of \$50 a year as ground rent.

So the rector receives \$25 every half year for the site, which is valued at more than \$7,500.00.

Dust Causes Asthma. Even a little dust can cause asthma. It is a disease which no words can describe. The walls of the breathing tubes contract and it becomes as if the very life must pass. From this condition Dr. J. D. Kellogg's Asthma Remedy brings the cure to the perfect rest. It relieves the asthma and normal breathing is firmly established again. Hundreds of testimonials received annually prove its effectiveness.

Decrease In Horses and Cattle

Alberta horses, mules and cattle have all decreased in number, according to the census of 1931 carried out by the Dominion Bureau of Statistics, but there are large increases in sheep, swine and poultry. Horses have decreased from 806,244 in 1921, to 731,990 in 1931; mules from 3,772 to 1,082; cattle from 1,383,553 to 1,198,616; sheep have increased from 431,464 to 798,298; swine from 423,258 to 1,062,908, and poultry from 5,170,302 to 9,016,428.

Word Growing In Use

"World" is a word constantly growing in use—world court, world bank, world trade conferences, world disarmament, world peace—and made possible only through better world understanding.

More War Than Peace

3,158 War Years In The Last 5,421 Years Of World's History

There have been 3,158 "war years" in the last 3,421 years of the world's history, according to statistics published by the Society of International Law.

The society's report said that so far as is known there have been only 268 "peace years," but incomplete records of this evil of nations make it difficult to determine definitely whether or even those years were entirely peaceful.

The "Old" and the "New"

What changes have taken place in half a century?

Here we have January 24th, 1885, telegraph lines between Montreal and Winnipeg (C.P.R.) connected at mile 760 (about midway) and congratulations exchanged. At date, January 25th, 1932, telephone across Canada. Halifax to Vancouver, inaugurated.

The British Museum has acquired the discharge papers of a Roman soldier, dating from A.D. 42, and consisting of two small inscribed bronze plates hinged together.

Mme. Kuroda, known as Japan's Mme. Curie, is regarded as the outstanding scientist of her sex in Asia. Her laboratory is located in Tokyo.

The two valves of the giant clam weigh 500 pounds.

**COMFORT
FOR COLICKY BABIES**

... THROUGH CASTORIA'S
GENTLE REGULATION

The best way to prevent colic, doctors say, is to avoid gas in stomach and bowels by keeping the entire intestinal tract open, free from waste. But remember this: a tiny baby's tender little organs cannot stand harsh treatment. They must be gently urged. This is just the time Castoria can help most.

Castoria is made especially for babies and children. It is a pure vegetable preparation, perfectly harmless and contains no harsh drugs or narcotics. For years it has helped mothers through trying times with colicky babies and children suffering with digestive upsets, colds and fever. Keep genuine Castoria on hand, with the name:

CASTORIA

CASTORIA

CASTORIA

CASTORIA

Find Ancient Wall

Excavations Result In Uncovering
David's Wall Beneath Dust Of
Thirty Centuries

An accident has led to the discovery, only a few yards underground, of the wall which David built around the ancient capital of his Israelite kingdom, now captured it from the Jebusites 3,000 years ago. Excavators reporting an old sewer found the long-hidden wall buried beneath the dust of thirty centuries.

The early history of Jerusalem is obscure, but the wall built by David is supposed to have been the first of many erected to protect it against countless tribes of invaders.

Fifty years ago Sir Francis Warren, in a survey of Jerusalem, marked out the approximate position of the first wall, running close by the Temple of Jehovah, but his calculations were not confirmed until the laborers began work on the sewer.

It was some years after David became king of the Israelites that he succeeded in conquering Jerusalem. He established his royal city on the eastern hill, near the site of ancient Zion, seat of the Jebusite rule, and appointed his leading commander, Jacob, governor of the city of David, which occupied the western hill and became the civil city. The David surrounded the royal city with a wall, built a citadel and supposedly under divine guidance, chose a site for the Temple of Jehovah, which Solomon erected.

David's wall is not the only discovery which has resulted from the new excavation, however. The workmen first uncovered, twelve feet beneath the surface, a road built in Roman times, made of stone blocks three feet square and a foot thick. Five feet lower another old highway of similar construction was found.

Catering To Tourists

Soviets Buy High Priced Cars To
Show Them the Country

Soviet Russia has placed an order in United States for 130 high-priced cars, the cost to be \$400,000, bringing the price of each car over \$3,000.

It is explained that the Soviet will use these fine cars for the purpose of entertaining tourists who may visit the country during the coming season.

No doubt the cars will be driven exactly where the Soviet desires them to go, and those who ride in them will see exactly what the Soviet wants them to look at.

For some years that has been one reason why those who seek to obtain first-hand knowledge of what is going on in Russia have stayed away from that country.

The only consideration under which entrance could be secured was that a party should be organized and personally conducted by an agent of the Soviet Government.

Riding around in an expensive car, with the gates of the government, will not change this at all.

Keeping Germany Down

British Nation Does Not Support
Policy Of France

Every scrap of evidence on the subject goes to show that Germany's present condition has been a considerable factor in continuing and intensifying the economic depression from which the whole of Europe is now suffering. It is France's deliberate policy to keep Germany in this condition of bankruptcy, not quite broken by her liabilities, but with such a prospect of liabilities before her as to make real recovery impossible. This is not and, except for a few mad months just after the war, never has been the policy of this country; but past experience has shown that individual foreign secretaries acting on private sympathies, and particular governments, confused by diplomatic complexities, have tended to support the attitude of France—Manchester Guardian.

RIMBEY FARMERS FOUND GUILTY OF TAKING WHEAT BONUS ON GRAIN NOT GROWN DURING 1931

Found guilty of obtaining a five-cent bonus on 1930 wheat, the bonus only applying on 1931 wheat, P. W. Hancher was fined \$25 and costs and James Jackson \$20 and costs by Magistrate R. H. Jones at Rimbeys on Thursday.

Both accused reside in the Lacombe district. Hancher was accused of obtaining a bonus of \$9.50 on 186 bushels of 1930 wheat from the Dominion government, between September 19 and 23 and Jackson of obtaining a bonus of \$12.40 on 249 bushels between October 13 and November 5, by false pretences.

Investigation by Constable R. James, Alberta Provincial Police, Rimbeys, led to the accused being suspected of obtaining the five-cent bonus on 1930 wheat. Further investigation by Constable James and the Board of Grain Commissioners led to the laying of the false pretences charges by W. H. Blachford, assistant commissioner for Alberta.

Both accused, when arraigned at Rimbeys, Thursday before Magistrate Jones of Lacombe, pleaded guilty to the charge. They had previously made restitution of the amount which they had obtained.

His Worship in fining Jackson, said he was imposing a smaller fine owing to the fact that Jackson did not deliver the grain in person, that it was delivered by a truck driver who apparently advised the elevator agent that the grain was grown in 1931.

In leaving the bench, His Worship expressed a hope that the case would be given general publicity, stating that future cases may not be dealt with so leniently.

W. H. Blachford, Calgary, prosecuted the case for the Board of Grain Commissioners.

THE POSITION OF ALBERTA

The Brownlee Government is facing financial difficulties created in considerable measure by its own U. F. A. rank and file in the matter of demands on the provincial treasury for guarantees for farmer-sponsored co-operative enterprises and for social services in advance of the province's ability to sustain.

A ten years' experience of government, markedly biased in favor of one class has resulted in disillusion all round. Occupational favoritism, has not conferred the benefits expected on the beneficiaries, but it has resulted in fostering a strong resentment among all other classes. One may exempt the small labor group in the legislature, which wholeheartedly supports the government, but not the party they represent.

The new income taxation will fall heavily on the wage earners in the cities. The rank and file of labor will have to put up their share of the losses caused by government largesse to agriculture.

It is a major misfortune that the majority of the people of Alberta have been excluded from the councils of the Brownlee administration during the past decade, despite the fact that provincial legislation is the most vital factor affecting their means of livelihood and destiny.

It has been computed from official statistical sources that the people of Alberta have been spending a large amount per capita per annum during the last three years above what has been earned by agriculture and industry in the province. It is an obvious assumption that the deficiency has been provided for out of private and public borrowings and legitimate and speculative investments from outside sources. This means of securing money, for the time being, has dried up and will be discontinued until such time as the people of Alberta readjust their affairs to a more profitable and stable basis.

One suggestion, which would lie within the powers of the administration, is that the provincial treasurer prepare a statement showing the trading position of the province during the past year—whether Alberta has a balance of trade in its favor or otherwise. This condition, favorable or otherwise, would be ordinarily reflected in the total amount on deposit in the banks of Alberta. Such information is available through Dominion government returns. Many state legislatures across the border incorporate in their annual reports the total bank deposits and assets within these states and these are considered in the making of annual budgets.

The people of Alberta are entitled to know to what extent economic condition are out of balance and to what extent industrial development is needed to rectify the situation.

THE CHURCH OF ENGLAND IN CANADA

Dioecesis of Calgary

St. Cyprian's Church, Lacombe

Rector: Rev. T. H. Chapman

March 20th, Palm Sunday

8:30 p.m. Sunday School

7:30 p.m. Evening Prayer

7:30 p.m. Evening Prayer

It is now definitely known that the Bishop will be here for the purpose of Confirmation at 8 p.m., on Thursday, May 12th; and also for a Celebration of the Holy Communion at 8 p.m., on Sunday, May 15th, the last named being in lieu of any other hour requested for the same date.

May 18th marks the 38th Anniversary of the formal erection of the Parish of St. Cyprian, but we have good reason for believing that the Services of the Church were held in Lacombe as far back as 1893—41 years ago. A "Building Fund" for the construction of the present St.

Cyprian's was opened early in 1900, and December 22nd, 1900 marks the formal opening of the Church.

The Young Women's Guild will hold their Annual Easter Tea in the Odd Fellow's Hall on Saturday, March 26th, from 5 to 6 p.m.

RED CAP IN FAIRYLAND

Red Cap in Fairyland, put on by the Junior Choir on Friday evening, was one of the most delightful events of the season. Every character in the play was well taken, the fairy dances were most pretty and graceful, the singing lively and bright. The soft, pleasing quality of the voices of the soloists is also noteworthy and the Brownies who added their touch of gamin meriment were a delight to the audience. Redcap (Kathleen Craig), whose characterization was extremely well done, wanders into an Enchanted Glade where she falls asleep. The Fairy Queen (Gladys Rhind) looking most royal and gracious in her queenly robes, welcomes her to Fairyland, where she is entertained by Fairies, Elves and Brownies. With the aid of the Queen's magic wand, Redcap summons to her side, Red Riding Hood (Patsy Hay); Cinderella (Phyllis McCaugherty); Jack and Jill (Bert and Lorna Craig); Aladdin (Jean Reeves); Boy Blue (Reggie Wilkes); Dick Whittington (Don Wilkes); and Father Time (Mr. R. Rhind), who sings of the quickly passing hours while he reminds Redcap of the necessity of getting home again.

The fairies in their pretty costumes were: Lorna Craig, Patsy Hay, Isabel MacKenzie, Mary Gilmore, Margaret Sheets, Phyllis McCaugherty, Mary Moore, Patsy Marshall, Rita Hunter, Jessie Riddoch, Grace McLeod, Clara Saunders, Jean Reeves, Nancy Ford, Nina Sage, Doll McDermott, Louise Todd. The Brownies; Kathleen Hay, Sheila Parsons, Margaret Watt, Frances Hall, Patsy Parsons, Betty Wilkes.

From point of view of attendance and in financial returns the play was decidedly successful and Miss Barbour and Miss Young are deserving of much credit for the beautiful rendition of the play which was given by the children.

Miss Barbour wishes to thank all those who by their assistance with stage properties or other items, contributed to make this event the success which it was.

ENTERTAINMENT AT SPRUCEVILLE

You will enjoy the following programme rendered by the artists from the Canada Junior College at Spruceville Hall, Thursday, March 24th at promptly 8 p.m.:

—Programme
String Trio, "Spring Twilight", Messrs. Roth, Powers & Monks.
Vocal Solo, "River Shannon, Mr. Ben. Glanzer.
Duet, "A.B.C. Song", Mrs. Wimer and Mrs. Hagie.
Hawaiian Guitar Duet, Messrs. Rush and Howard.
Reading, "Cuddy", Miss Ruth Stickle.
Male Quartette, "Round My Indian Home", Messrs. Glanzer, Hagie, Roth and Norwood.
Dialogue, "Cooperation", Mr. and Mrs. Hagie, Miss Howard and Mrs. Lindgren.
Vocal Duet, "Down the Vale", Miss Neithercut, Mr. Rush.
Reading, "Willie Took A Bath", Mrs. C. Lindgren.
Hawaiian Guitar Duet, Messrs. Rush and Howard.
Vocal Solo, "When You Come Home", Mrs. C. E. Wimer.
Trio, "Selfish", Messrs. Roth, Powers and Monks.
God Save the King

ST. ANDREW'S NOTES

The Mission Band will meet on Sunday, March 20th immediately after Sunday School.

All women of the congregation are invited to attend the Easter Thank Offering meeting of the W.M.S., to be held in the United Church on Monday, March 28th. Dr. Margaret MacKellar will be the speaker at this meeting, and also at the Presbyterial to be held in Wetaskiwin on Tuesday, March 29th.

Communion of the Lord's Supper will be held on Sunday morning, April 27th and at the evening service an Easter Cantata will be rendered by the choir.

On March 20th, "Home Sunday" will be observed. During the afternoon members and adherents of the church will receive a social visit from representatives of the Board and Session.

Remember the old timer's reunion to be held on April 3rd and 4th. On Sunday morning some of our real old timers will give reminiscences of the early church life of Lacombe and a special speaker is being obtained for the evening. On Monday evening a 3d. supper will be served by the Ladies' Guild and there will be a speaker for the occasion also. Following his address the meeting will be thrown into a good old time social. Are you All in a Fog? Then watch for Who is Who on Friday, April 22. The Young Ladies Auxiliary will enlighten you.

POPULAR THEORY LACKS FOUNDATION

There are a number of fallacies very dear to the public. Those who have pursued "An American Creed" will have an idea of the number and extent of these mistaken beliefs current on this continent at least. One of the hardest is that Scottish people

are tight-fisted. The belief has been the basis of more jokes than even mothers-in-law.

The absurdity of this contention is, of course, obvious to anyone who has known Scottish people intimately. Striking refutation of it is found in a report from the Old Country, which says: "Congratulations are due to the students of Glasgow University who performed the remarkable feat of extracting \$57,000 from Glasgow pockets on Christmas Day, not only in the worst of bad times, but immediately after the first instalment of income tax had been paid. It was a very fine performance indeed. The collectors were not assisted by weather conditions, which were far from ideal. A notable feature of this year's Christmas Day has been the complete silence of the disgruntled, who generally complain to heaven about the collectors' persistence, or else their imaginary bad manners, through the columns of the press."

Schoolmen are careful, not close. They are, considering their numbers, the business men of the Empire. A Scotman founded the institution now known as the Bank of England and taught not only the English people but the British government itself. Travelers in Scotland find it difficult to reconcile their preconceived notion of the people with the open-hearted generosity and unstinted hospitality which they meet. The fallacy of Scottish tight-fistedness, like Irish pugnacity, must go.

AT THE AVAION

William Haines, as the genial graffer, J. Rufus Wallingford, is the attraction this week at the Avalon Theatre, where "New Adventures of Get-Rich-Quick" is Wallingford, suggested by the famous

Comopolitan Magazine stories, is now playing.

The irrepressible Haines romps through a series of amazing adventures in high and crafty finance aided by Jimmy "Shoeshoe" Durante as a comic chauffeur, and by Ernest in the role of the same phony blowing Blackie Daw. Lolla Hays is the heroine.

The story starts aboard a ship, Blackie tries to swindle J. Rufus Wallingford in a card game—and the plot he develops unfolds him. So they become partners, and start out looking for new suckers to trim. The first is a manufacturer. One of the funniest scenes in the picture is his adventures with the master grafters in the bank. A pretty love story is blended with the comedy and Wallingford finally meets his reform.

Coming: Mar. 24, 26, 28, "The Sin of Madelon Claudet," featuring Helen Hayes, one of New York's greatest stage stars.

March 31, April 1 and 2, "Monkey Business."

With all the shouting... don't forget the fundamentals

THIS has been a great year for outstanding improvements in new motor cars, hasn't it? But with all the shouting about 1932 improvements—may we as McLaughlin-Buick dealers place before you a basic thought? McLaughlin-Buick has been continuously manufactured in Canada for over 24 years, during which it has earned the enviable reputation of being Canada's standard car. We think that this is a reasonable statement because more than twice as many people buy McLaughlin-Buicks as the second car in its price range. This has held true year after year. Then, too, 80% of our owners buy McLaughlin-Buicks again and again. And while you consider the tremendous value to you of such a reputation as a buying guide, don't forget that the new McLaughlin-Buicks for 1932 contain over 100 improvements! They are most modern cars, in advance of the industry in many respects.

We cordially invite you to learn by your own tests the great pleasure and ease of driving you will enjoy in the new McLaughlin-Buick Eight.

Chevrolet is a Fully Modern Car, yet Costs Less for Gasoline, Oil and Upkeep

NEW thrills await you behind the wheel of a new Chevrolet Six. Synco-Mesh gear shifting is the easiest thing imaginable! Free wheeling takes all the effort out of driving! You experience the dashing speed and vigorous "pick-up" of 60-horsepower! And, in addition, you enjoy the full benefit of built-in, six-cylinder smoothness. Moreover, all these pleasures of modern motoring are heightened by the knowledge that you drive a car that costs less to run. Chevrolet's famed economy starts on the day of purchase—and extends throughout the long, proudest period of Chevrolet ownership. For the new Chevrolet Six, with all its ultra-modern features and advantages, is offered in one of the very lowest price groups! And as far as operating costs are concerned, each day brings new proof that Chevrolet costs less for gasoline, oil and upkeep than any other full-sized car you can buy, regardless of the number of cylinders! Visit our showrooms—get the facts and figures on Chevrolet economy now. You'll be convinced that Chevrolet's new Six is the car to buy for modern, low-cost transportation—the Great Canadian Value!

Mrs. Young and Miss Young, of Ontario are visiting Mr. and Mrs. O. S. Young and Mrs. W. P. Young.

MALONEY BERATES PROTESTANT WOMEN

J. J. Maloney—that ex-Cleric—does not think Protestant women are doing the right thing. In his paper "The Liberator", just to hand, he says:—

"All Roman Catholics rear large families. Statistics show the average Protestant family is from three to five. The Roman Catholic families range from 14 to 20. Roman Catho-

lics marry young, which gives them a great advantage."

"We would ask what is Maloney going to do about this state of affairs? He might as well Houdley."

EDSON THEATRE IS DESTROYED BY FIRE

The Edson Theatre at Edson was burned at an early hour on March 16th. The management of this theatre was taken over by F. L. Dumphy about two months ago when the theatre was first discovered the back of the auditorium was in flames. Mr. Dumphy's family was living in the front of the second story of the building and all got safely out. The building was partly covered by insurance.

BRITAIN STAGES ECONOMICAL REVIVAL.

Great Britain's economic recovery since the abandonment of the gold standard has opened the eyes of the auditorium was in flames. Mr. Dumphy's family was living in the front of the second story of the building and all got safely out. The building was partly covered by insurance.

Other nations, and particularly France, have been too ready to regard Great Britain as a spent force. Recent events have proven to the contrary. Britain's troubles were brought on by too generous treatment of France and other European debtors after the war. She received co-operation from the beneficiaries, and in fact, France took occasion during last summer's financial crisis caused by the German situation to accentuate British troubles by withdrawing her gold balances from London.

Signs are not lacking that Britain has played a master stroke in adopting a protectionist policy. She is now in a position to bargain with France, the United States and other hard tariff countries. As the one open market the old country experienced the full effects of forced selling by those nations which must, at any cost, secure surplus funds for debt payments to the United States. They were not concerned with British welfare.

The economic revival of Great Britain is based on solid foundations. For the calendar year 1930 her total overseas trade, valued at over \$6,000,000,000 exceeded that of any other nation, and judged solely by visible exports was surpassed only by that of the United States. Assuming that her re-exports are not included and that Germany's reparation deliveries in kind are similarly ignored, Great Britain holds the second place in the world of 1930, the latest period for which comparable figures are available—than of either of her rivals, the United States and Germany. She owns one-third of the world's shipping, which in a normal year is estimated to produce a gross earnings abroad of about \$600,000,000. This sum, as well as payments for her banking and insurance services, represent invisible exports, and are important factors in helping to adjust her trade balance.

Her investments abroad are estimated to yield a yearly dividend in excess of \$10,000,000,000.

Announcing

The Imperial Economic Conference

The outstanding event listed on the Canadian national calendar for 1932 is the Imperial Economic Conference which will open at Ottawa on July 18. The deliberations of this conference, the decisions it may reach or fail to reach, even the spirit manifested within the conference, will have far-reaching effects not only upon Canada and the British nations of the world, but upon all nations.

Because this is true, the people of Canada will follow the proceedings of the conference with an interest surpassing in its intensity that usually displayed by them in the sessions of their own parliament. It is, in a sense, a parliament of the Empire that will be in session, and while its conclusions will have to be confirmed and ratified later by each individual parliament in Great Britain and the Dominions, it is safe to say that once the conference itself has reached unanimity, its decisions will be accepted by all.

On the other hand, should the conference fail in its avowed object, should it prove as abortive of results as the London conference of 1930, the outcome may possibly be very disastrous; in fact, in such an event, it would have been better if there had been no conference. British people everywhere entertained high hopes of the conference of 1930 in advance of its sittings, and their disappointment over its almost complete failure was correspondingly great, their only consolation being the decision reached to meet again and make another try for success.

All political parties in Canada are sincerely desirous that the Ottawa conference should succeed where the London conference failed. We believe the same can be said of all political parties in Great Britain and the other Dominions. If this united will to succeed is persisted in, if it becomes intensified as the opening days of the conference approaches, if the determination of the masses of the people that the conference shall succeed is manifested everywhere, then success will be achieved.

That such a feeling and desire now animates the people of Western Canada is indicated by the proposal made in the Saskatchewan Legislature that all parties in that Assembly should unite in framing and unanimously adopting a resolution setting forth the views of their people as to the policies which Canada should pursue to the conference, thus, so far as Saskatchewan is concerned, eliminating all partisan contentions. The suggestion goes even farther, namely, that all the other Western Provincial Legislatures should follow the same course. In a word, the suggestion is that so far as the Western Provinces of Canada are concerned they should, in advance of the conference, reach common ground in regard to matters of policy in the sphere of Empire trade, as the interests of the West may be affected thereby, and acquaint the Ottawa Government of its conclusions.

Great Britain is to be represented in the conference by a new National Government representative of Conservatives, Liberals, and a section of Labor. Australia will be represented by a new Government representative of a combination of political groups. It is well, therefore, that the national viewpoint of Canada, as represented by political groups, should thus be certain and presented to the Canadian Government.

Admittedly the difficulties to be overcome, the problems to be solved, are many and great. The national interests of each component part of the Empire have to be recognized, while the combined interests of all are being worked out. There must, therefore, be a willingness to give and take, to compromise, to reach common grounds of understanding, rather than to adopt inflexible attitudes. Fortunately for the ultimate success of the conference this fact appears to be more generally recognized and accepted than heretofore.

It is fortunate, too, that in manufacturing circles in Eastern Canada there everywhere in evidence a willingness to go some way at least in the direction of more encouragement for the sale of British-made goods in Canada in return for preferences in the Old Country markets for those products which constitute the great bulk of Canada's export trade. Taken all in all the omens appear to be favorable to a successful outcome of the conference's deliberations.

It is also well that the move for unanimity in the matter of Canadian policy in the conference should originate in these Western Provinces. No part of Canada stands to gain more, or to lose more, than does the West. For example, it is universally recognized that the success of the Hudson Bay route depends upon the development of a large import trade from Britain through the port of Churchill. An absence of such import trade means that the export of grain and other Western products will be strictly limited because a one-way rail and steamship traffic can never succeed. It is economically impossible, too expensive, because without two-way traffic vessels put on the route, rates on both railway and such ships as do operate will, of necessity, be too high to insure success.

This is but one aspect of the subject, small, perhaps, in relation to the whole subject Empire trade, but very important to Western Canada. It is because of just such aspects, however, that a unity of Canadian opinion is so essential before the conference begins its work. It is to be hoped that such unity will be established and find expression around the conference table.

Japan Courting Disaster

By Breaking Pledge To Respect Chinese Territory and Independence

What is now clear is the fact that Japan's diplomatic and military objectives are one and the same. The empire is acting as a unit, in spite of the protestations of its diplomatic representatives. Japan entered upon an adventure last September whose sequel no one can foresee, but with each act of aggression the resistance to Japan increases and consolidates. The Empire may have a secret ally, or perhaps two, but it courts disaster, nevertheless, by antagonizing nations to which it has given its pledge to respect the territory and independence of China.

Releaking Old Windows

Stained glass windows have been taken from the windows of Marton College Chapel at Oxford to be cleaned and releaked. These windows are 600 years old and some of them have not been releaked since they were first erected in 1293.

The largest church edifice in America is at Mexico City.

The Chinese Government has placed an order for freight cars in Scotland.

Palpitation of the Heart Could Hardly Get Around

Mrs. Charles Storn, R.R. 6, Ficton, Ont., writes: "I was troubled with palpitation of the heart; couldn't sleep, day or night, and was so weak I could hardly get around. After taking Milburn's Heart and Nerve Pills I was greatly relieved of these attacks. My mother also has great faith in them and finds no other medicine can help her so much for heart trouble. I can assure you that Milburn's Heart and Nerve Pills are a wonderful builder."

Saskatchewan Leads In Mental Hygiene

National Committee Expresses Hope That All Large Hospitals Will Follow Lead Given By Hon. Dr. Munro

The report of the activities of the Canadian National Committee for Mental Hygiene for the period 1930-31, just issued, makes special complimentary reference to the work being done by Saskatchewan's Minister of Public Health, the Hon. Dr. Munro, in connection with the establishment of a division of Mental Health in Saskatchewan.

"The progressive Ministers of Health," says the report, "is taking a statesmanlike interest in mental hygiene and has created a division of mental hygiene in the province. This division to work out policies and programs in regard to mental institutions, clinics and the application of mental hygiene principles to education, social work, administration of justice, etc. The Minister of Health has also made possible the organization of psychiatric wards in connection with the Regina General Hospital. It is to be hoped that all large general hospitals throughout the country will follow this lead furnished by Regina."

During the period 1930-31 the Canadian National Committee for Mental Hygiene has been active in all parts of Canada in the promotion of mental hygiene projects of various standing, places of work include a survey of the Province of Prince Edward Island; organization of a post-graduate centre in psychiatry in Toronto; integration of mental hygiene into the school system of Montreal; activities leading to the enlargement of the mental hospital at Brandon, Manitoba; arrangement in collaboration with the Federal Census Bureau to secure uniform statistics from mental institutions of the country; publication of weekly articles in two hundred newspapers; demonstration of the value of social work in the parole of mental patients in British Columbia; establishment of a Division of Mental Health in connection with the Department of Public Health of the Province of Saskatchewan; organization of psychiatric wards in connection with the Regina General Hospital; educational publicity; continuation of important research activities at four leading Canadian universities and the knitting of mental hygiene activities through co-operative efforts between the National Committees of Canada and the United States.

It is also well that the move for unanimity in the matter of Canadian policy in the conference should originate in these Western Provinces. No part of Canada stands to gain more, or to lose more, than does the West. For example, it is universally recognized that the success of the Hudson Bay route depends upon the development of a large import trade from Britain through the port of Churchill. Nerves Kept Her Awake

Mrs. Gilmer Says She Slept Like Log Since Taking Dr. Williams' Pink Pills

"I am so thoroughly refreshed by Dr. Williams' Pink Pills for Pale People that I can sleep at night. Many nights I could not sleep at all, and would get up and walk the floor. A friend told me her mother was in the same condition and had found relief by taking Dr. Williams' Pink Pills. I have taken four boxes and can now sleep like a log, and I feel so refreshed in the morning I do my own housework and am a fresher body."

The reason why Dr. Williams' Pink Pills are so effective in such cases is that they create new red blood cells, which supply to the nerves the very elements they need for normal functioning. Try them. At your druggist's 50c a package. 25¢ a box.

New Freight Ruling

Family Car, Mrs. N. B. Howard With Household Goods

Like the kitchen table, the chest of drawers, and the little Jimmy's playthings, the family car in the future will be considered by Canadian National Railways freight officials as just another household effect for rating purposes, as a result of a new ruling that has just become effective.

Under the new schedule when household goods are moved in carload lots from points in western Canada to the east, or between points in eastern or western Canada, the family automobile, whether it is a tin lizzie or an expensive limousine, may be included in the shipment to move at the same rate as that charged for household goods. This new rate is considerably lower than that previously charged for this type of traffic.

The same ruling will, shortly, be made to apply to the shipment of the family automobile with household effects from eastern centres to the west.

Persian Balm creates and preserves lovely and youthful "beauty spots" on the face. Fragrant as a flower. Cool as morning dew. Swiftly absorbed by the tissues, making the skin smoothly soft-textured. Unrivalled as an aid to feminine elegance. Delightful to use. The additional charm of the "beauty spots" of the face. The only toilet requisite for the exacting woman. Persians is a beautifier.

It is fortunate, too, that in manufacturing circles in Eastern Canada there everywhere in evidence a willingness to go some way at least in the direction of more encouragement for the sale of British-made goods in Canada in return for preferences in the Old Country markets for those products which constitute the great bulk of Canada's export trade. It is to be hoped that such unity will be established and find expression around the conference table.

Government and Municipal Co-Operation

Necessity of Economy in Order to Safeguard Solvency of Municipalities

Hon. Howard McConnell, Provincial Minister of Municipal Affairs for Saskatchewan, has addressed a letter over his personal signature to the various municipalities pointing out the necessity of close co-operation between Saskatchewan Government and the municipalities. He points out the paramount importance of safeguarding the solvency of the municipalities, by pursuing a course of the most rigid economy. He pays a tribute to the public spirit of certain municipalities, pointing out that there have been instances where tax collections in districts where crops have not been good, have exceeded tax collections in districts where crops have been reasonably good. In some districts which have been dried out the financial statements submitted have given the greatest encouragement. Regret is expressed that in some municipalities more favored in the way of better crop financial conditions are not what they should be.

The Minister expresses the desirability of the employment of capable secretaries and paying them reasonable returns for the important services rendered. He urges the utmost economy in preparing the budget for the coming year, and suggests that only the most necessary expenditures be included in the budget, with a view of the forthcoming budget with an indication of the proposed savings, and offers the earnest co-operation of the Government, the Minister, and the Department.

Much Liquor Smuggling

Claim Made That 176 Vessels Are Operating Along U.S. Coast

Officials of the United States coast-guard estimate that "large, highly-organized international combines" are operating 176 liquor-smuggling vessels along the United States coast.

Rear Admiral P. C. Billard, commandant, so testified before the House of Representatives appropriations committee in hearings on the treasury department supply bill.

These vessels, Billard estimated, are landing the same amount of alcoholic liquors that 163 ships did last year. He added:

"It is perfectly apparent that if we had a sufficient number of coastguard craft to keep all the smuggling vessels under constant surveillance, we would have the situation entirely controlled."

"Our information indicates that there are at the present time 91 foreign liquor vessels engaged in the business of smuggling liquor along the Atlantic coast."

Aid Beet Sugar Industry
Matter To Be Renewed By Parliamentary Committee On Agriculture

Problems facing the sugar beet industry in Canada will be reviewed by the parliamentary committee on agriculture. The House of Commons instructed it to devise means to place the industry on its feet, whether by the granting of a bounty, or by the imposition of a duty on foreign sugar.

After a debate, the House adopted the suggestion of J. S. Stewart, Conservative, Lethbridge, to refer the question to the agricultural committee. Originally the subject was introduced by Dr. F. W. Gershaw, Liberal Medicine Hat, in a resolution calling upon the government to co-operate with the sugar factories in promoting the processing of home produced beets. This resolution later was withdrawn in favor of the Stewart amendment, which the House adopted without a recorded vote.

Advocates Empire Currency
Australia is known to be strongly in favor of an Empire currency, which would be immune from the disastrous fluctuations which penalize trade under the existing system. Empire trade financed by Empire currency may not be so visionary a goal under circumstances which compel statesmen to examine closely every possible device for promoting the prosperity of their respective countries.—Bristol Western Daily Press.

Permits a Choice
"You must remember, my boy, that wealth does not bring happiness," said the fatherly parson.

"I don't expect it to," answered the modern youth. "I honestly want it so that I may be able to choose the kind of misery that is most agreeable to me."

Sam—"Do you refuse to pay me that two dollars I lent you?"
Rastus—"Oh, no, sir! Ah! don't refuse. Ah, jes' refrain."

A Japanese legend has it that music was devised by the gods to lure the sun-goddess from a cave where she had retired.

"My life is like the alphabet," complained the bored stenographer, "just one letter after another."

A new electrical recording instrument detects errors of one-millionth of an inch.

Some of the hardwood tree species give off as much as 80 quarts of water per day by evaporation.

If History Repeats Itself

Should Japan Win China Will Absorb Them Says Professor

China may be conquered by Japan or by some other people, but if history repeats itself, she will absorb her conquerors. As Mr. Abbott of the Manchuria, the Hunan, the Mongolia and the Tartars.

This view enabled Dr. Kiang Kang-hsi, professor of Chinese studies, McGill University, to look with traditional Oriental calm on the eastern imbroglio, when he lectured before the Mechanics' Institute on "Chinese History in Sixty Minutes."

The imposition of a government from outside is comparable only with a change of party administration in a western country, he said, and the people have a habit of marrying the conquerors and so absorbing them.

"We may be beaten down; we will never be beaten out," he predicted. If Japan should conquer China within 75 years Japan would be Chineseized; China would never be Japanized, he said.

Facts About the Moon

One Side Very Hot and the Other Intensely Cold

Professor Stewart, of Princeton University, predicts that within the next hundred years our great-grandchildren will travel to the moon in a rocket-propelled ship which will cost \$400,000,000 to build. There are one or two little things found necessary to humans which are not found on the moon. For instance, there is no air, no water, no food. Also the climate of the moon is somewhat unsuitable.

On the side turned towards the sun the temperature rises to 244 degrees Fahrenheit, which is a good deal hotter than boiling water. On the other side it falls to 244 degrees below zero—273 degrees of frost. Actually no human being could live for an instant in such heat or such cold.

Film Activities of the Prince
Furnishes Good Idea Of How His Royal Highness Has To Work

A film introducing the personal interests and activities of the Prince of Wales has been made by A. Stanley Williams, and was privately shown recently at the Phoenix theatre. Naturally, there are no special photographs of the prince, but the film includes many "topicals" which have not been often shown, and gives a good idea of how hard his Royal Highness has to work. There are also pictures of the prince's farms in Cornwall, where he is known as the Duke. The film will be publicly shown in the West End.

Time Has Tested It—Dr. Thomas' Electric Oil has been on the market upwards of fifty years and in that time it has proved a blessing to thousands. It is in high favour throughout Canada and its excellence has carried its fame beyond the seas. If it were double the price it would be a cheap liniment.

A new automobile plant in England will burn 300 tons of rubbish daily which will supply electricity for the hundreds of motors in the plant.

Extensive ore-mining activities in Sweden are causing an increase in the manufacture of explosives.

Making of matches is growing rapidly in North China in spite of the lack of manufacturing machinery.

He: "Did you sound out your parents about getting married?"
She: "Yes, and Dad sounded the worst."

HEADACHE

THE woman who lets headaches upset her plans must have her eyes and ears closed to certain facts about Aspirin. There is always swift comfort, and never any harm, in Aspirin tablets. Doctors have said so; men and women everywhere have found it so. Any headache—from any cause—is always relieved by one or two tablets. And lots of other aches and pains. Neuralgia. Neuritis. Rheumatism. Nerving pains. The pain from colds which make you "ache all over." Sore throat. Systemic or "muscular" pain. Aspirin can spare you lots of needless suffering! Be sure you get Aspirin—not a substitute!

ASPIRIN

Rings On Douglas Spruce Indicate That Ancient Tree Has Lived For 3,200 Years

Man's intelligence has discovered that various objects, animals and inanimate, reveal in their own bodies records of the ages, but that his own body is not similarly endowed, and when discovered presents evidence of the most disputable nature. Not so with trees. A tree is a self-revelation, as is told in an address appropriately delivered by Professor F. E. Lloyd before a section of the Canadian Pulp and Paper Association at Montreal.

The tree speaks in the language of history, and to those conversant with the tongue, discloses its age. The rings in a Douglas spruce on this continent, for instance, prove that it has lived 3,200 years; and probably nothing else that is living and is not vegetable, so similarly indisputably survives for thousands of years.

Prof. Lloyd reverts to what has happened in the world since the seedling of that ancient spruce germinated. He sees Abraham leaving Ur of the Chaldees to start his pilgrim's journey. He sees the Christian religion being founded. The tree that has been buffeted that storm in vain have blown on a host of wars, migrations and upheavals. The leaves on it have come, and gone, and come again, endlessly, but the trunk has remained, and the rings have been cast down into the dust.

Man, the family of man, has been unable in his body to disclose the story of his endurance. His age has always been a problem. He has never agreed who was first, or how long were the oldest. Man might, like a horse, have his age told by his teeth, but what he now has more of indicates a stage in the dental art. His periodicity has been set by the loss of his teeth, and by how many are claimed by high-growers to be as indicative of man in the present as they were of him in pre-glacial eras.

No such uncertainty beclouds the age of the venerable Douglas spruce. Its birth certificate is in its trunk. Its rings make a weather chart of the centuries. The narrow rings tell the seasons which were short and cool; the wide rings record the years of warmth and sunshine. That old tree tells the story of the weather for three thousand years.

Man's body does not reveal even the weather of the ages, and tells less than do the trees whose pulp substance is depleted for its impermanency and weakness of intellect. Man's age can only be inferred from the buried bones and trinkets he leaves strewn in his primitive habitat. The early history of the inhabitants of British Columbia has been told by Professor H. H. Turner, who has dug out of their middens at Vancouver. But as remotely of the past as he is the utensils picked up from where the cave-men threw them, they are but of yesterday's time in the area of the magnificent old Douglas spruce—Winnipeg Free Press.

More Salmon For

Canadian Streams

Culture Experts Obtained Eggs From Ponds In Maritime Provinces. More than 31,000,000 Atlantic salmon eggs were collected during the autumn of 1931 by the Fish Culture Branch of the Dominion Department of Fisheries and the resultant fry will be distributed in suitable streams next spring and summer. It is by work such as this that the fish culture experts help to maintain and build up the stocks of Canada's commercial fish and sport fish.

These particular eggs were obtained at the seven salmon ponds which the department operates in the Maritime provinces, and although most of the ponds yielded larger collections than in 1930 the grand total was not quite as high as in that year. A feature of the year's work was a record collection of landlocked salmon eggs at the Chatham Lake, New Brunswick. All told, over 346,700 of these eggs were obtained.

More than 120,000 radio receiving sets of three or more tubes each were manufactured in Austria last year, more than five times as many as were made four years ago.

Frogs are not native to the Hawaiian Islands, but half a dozen kinds of toads and frogs, including bullfrogs, have been introduced.

"Goodbye, my boy. Enjoy your holidays and try to return with a bit more sense!"

"Thank you. Same to you, sir!"

Storing Potatoes

Kubers Keep Best At A Temperature Around 39 Degrees

The current issue of the newsletter issued monthly by the Dominion Dairy and Cold Storage Branch contains an interesting reference to some of the effects of freezing on potatoes. Potatoes keep best at a temperature around 39 degrees Fahrenheit. At any temperature below this some starch is converted into sugar. The lower the temperature, the greater the change. A sweet flavour is not a sign that a potato has been frozen but merely that they have been kept so cold that sugar has accumulated—frozen potatoes are soft and unusable. Sweetness can be overcome by storing potatoes for a few days at ordinary room temperature.

Some Good Blind Cooks

Acute Sense Of Touch And Sound Makes Success Possible

It is surprising to learn that it is now possible to teach blind people to cook, and that some of them are doing very well indeed at this work. They distinguish different ingredients by means of the sense of touch. The same sense also helps them in measuring quantities and in the management of the cooking stove. Other senses come into play. Sound tells the blind cook when a liquid begins to simmer when it gets hotter, and finally when it boils. And if a dish is cooking too quickly, that fact is advertised by the sense of smell. Electric stoves are safest for the blind cook.

Two Animals In One

Queer Pet Has Characteristics Of Both Cat And Rabbit

Cat or rabbit, well John Tilley, farmer of Arthur, Nebraska, doesn't know which he has on his farm. In fact, it's both.

His pet, six months old and healthy, has a mellow like a cat, eats green stuff and meat alike, uses its front feet like a cat does its paws, hops around on his rear quarters like a bunny and that isn't all.

The pet looks like a rabbit, rear view; but like a cat, front view. It has the whiskers of a tomcat, the ears of a rabbit. His rear legs are jointed like those of a rabbit.

Jacky

By Annetto

DELICIOUSLY PRACTICAL LITTLE DRESS FOR A TINY GIRL FOR PLAYTIME

It is so cute, dainty and swinging of skirt. And all because the designer inserted godets at the front of this one-piece dress. They are merely little pieces of the material cut out at the hem, tapering to a point toward the waistline. And isn't the deep pointed collar attractive?

It's as easy as A, B, C to make it! And it requires such a small amount of material, it will cost you next to nothing.

The original was yellow and white dimly print with plain yellow. The blue plings were brown.

Style No. 988 is designed for sizes 2, 4 and 6 years. Size 4 requires 1 1/2 yards 35-inch with 1/2 yard 55-inch contrasting.

Price of pattern 25 cents in stamps or coin (cash is preferred). Wrap coin carefully.

Canadian Wheat Flour

May Launch Campaign To Demonstrate Value For Bread Making

A campaign to demonstrate to the people of Europe the value of Canadian wheat flour for bread making is under consideration of the Department of Trade and Commerce, H. H. Stevens, Minister of that department, told the supply committee of the House of Commons.

The details of the scheme are being worked out and the announcement was perhaps premature as definite plans were lacking. He had been greatly encouraged by similar campaigns carried out in the past and he was of the opinion that advertising might play a leading part in a return to prosperity.

Mr. Stevens referred to the recent campaign to further the interests of Canadian grape growers. The government had contributed financially, and there had been remarkably successful results. A campaign to popularize the Canadian apple abroad and to stimulate interest in Europe in Canadian sea foods and in Canadian cattle, had met with marked success.

Have Double Inclination

Reason Given As To Why Some People Stutter

People who stutter were pictured by a scientist at Baltimore, as being like a motorist trying to "step on the gas" and apply the brakes at the same time.

A battle for control between "starting" and "stopping" mechanism in the brain is the cause of stuttering, the American Orthopaedic Association was told by Frederick W. Brown, member of the committee for mental hygiene.

One part of the stutterer's brain, the motor complex, which controls speech, is urging "go ahead and say it," while another part, the thalamus, which responds to emotional stresses, is clamoring "Don't say it!"

Stuttering occurs only when the speaker's emotional responses get out of control, Brown declared.

A Bit Of History

Reason Highland Clan Was Massacred By English King

The massacre of the MacDonalds of Glencoe, a Highland clan, occurred in February, 1692. King William III, who had issued a proclamation by which all clans were required to submit by January 1, 1692. For one reason or another this particular clan had failed to make submission, and the Master of Stair, Sir John Dalrymple, obtained a decree to "extirpate that set of thieves," which the King is said to have signed in ignorance of its real meaning. Every man under twenty was to be killed, and this was done by one hundred and twenty soldiers of a Campbell regiment who had been hospitably received by the Highlanders.

An Embarrassing Present

"If someone gave you a railroad as a present, what would you do with it?" The St. Thomas Times-Journal try to find out what we had done to the donor that he should play up such a dirty trick. Even ties are likely to be embarrassing when received as presents, to say nothing of rails and trains and stations and such.

Weighing only 11 pounds, a single cylinder motor has been invented in Germany to supply power to ordinary bicycles.

Government aid is asked by the Ulster flax industry.

New Canadians

21,392 Persons Became Naturalized Canadian Citizens During Last Year

A total of 21,392 persons became naturalized Canadian citizens during the fiscal year which ended March 31, 1931, according to the report of the state department, tabled in the House of Commons recently. Of these the largest individual nation group was from Russia, with 4,600. Certificates issued numbered 10,897, covering the whole number of naturalizations and embracing the names of wives and minor children.

During the year 37 certificates of naturalization were revoked. Most of the nationalities of the world were represented in 20,000 new Canadians, Central Europe figuring very largely in the lists. Poles were second to Russians, with 3,022. The third largest national group was composed of Americans, whom 2,339 were naturalized.

Others were: Italians, 2,067; Austrians, 2,008; Serbians, 929; Germans, 143, and Norwegians, 680.

One Afghan, one Cuban and one individual from the state of Mount Lebanon, Syria, received certificates, while the nationality of one person granted naturalization could not apparently be defined since he was recorded as having "no country."

This Method Is New

Collector Learned How One Man Paid His Bills

A bill-collector who goes around annoying people had a bad time the other morning at one door he knocked on. When the man of the house appeared and was handed the bill, he plainly showed his annoyance. "Listen, my man," he told the collector. "On the second of every month my wife takes all the bills and drops them into a wastebasket. I blindfold her, and she takes a big stick and stirs and stirs. When all the bills are nicely mixed up, she draws out five of them. Those five we pay. Now do you know what will happen to you if you keep on bothering us with that bill of yours?" He glared at the collector. "You won't even make the wastebasket, that's what'll happen!" The collector said he was sorry and that he would like very much indeed to have his bills put in the wastebasket, and went away.

Reward For Aviators

Chinese In Ottawa Make No Charge For Laundry Work

One of the Canadian fleets who has offered his services to fight under the Chinese Nationalist flag in the Far East, went into a Chinese laundry at Ottawa for his shirt and collar. He wore a uniform of the Royal Canadian Mounted Police.

"You airman?" asked the laundryman.

The flier replied in the affirmative. "No charge for laundry," said the Chinese as he handed over the parcel.

Vimy Ridge Monument

The Vimy Ridge monument, largest memorial ever erected, will be completed in 1935, Hugh L. Alward, Toronto, son of Walker S. Alward, the sculptor, stated upon his arrival from England. The monument, commemorating the capture of Vimy Ridge in 1917, will be 145 feet high.

In some parts of Scotland the finding of a four-leaf clover denotes bad instead of good luck.

Much construction work has been started recently in Canton, China.

KASHMIR'S RULES MAY ABDICATE AND BRITISH REGENCY SET UP

As a result of the unrest and rebellion seething in the Kashmir State, where a population predominantly Moslem is ruled by a Hindu Maharajah, Great Britain may call upon the present ruler, Maharajah Shri Harising Bahadur, to resign in favor of his infant son, who would rule under a regency established by the Motherland. The picture (top) is very interesting in that it shows the present Maharajah of India speaking at the India Round Table Conference in London, England. Below is a view of the wonderful palace of the Rajah.

Many Instruments Of War

Submarine Not Only Means To Human Lives

On the eve of the World Disarmament Conference, the submarine again has made tragic appeal for some cessation in the arming of nations against nations.

The sinking of the M-2 in the English Channel raises the total of man lost in peacetime operation of submarines during the last ten years to 813.

Of course, this is only a part of the price paid in human lives for the privilege of preparing for war. The submarine is only one instrument of warfare. In the United States alone fatalities with military airplanes have reached half that figure during the same period. The total for planes in all nations must exceed it. Experiments with poison gases and other weapons have added their quota.

But the prolonged tragedy of submarine disasters has evoked a special outcry against undersea craft. It is also said that they are a stealthy weapon. But just at this time when the nations are thinking about putting away some of their weapons, it may be well to recognize that other instruments of human slaughter may be no less hateful in war and useless in peace—Christian Science Monitor.

British Columbia Lumber

Mills Are Looking Forward To Large Orders From Britain

Details of the new British tariff containing a preference for British Columbia lumber will go a long way towards improving conditions in the lumber industry in that province. British Columbia exports about 100,000,000 feet of lumber a year to Great Britain, out of a total British import of some 4,000,000,000 feet. It is believed B.C. should get a large share of the total if it enjoyed a preferential tariff. But the immediate problem, surprisingly enough, will be for B.C. plants to supply any large orders that may come from Britain, particularly as new orders are coming in heavily from Australia to B.C. mills.

Student Dies From Injuries

V. A. Wood, fourth-year student injured in an explosion in the mining building at University of Toronto, is dead. Wood was working under the direction of Professor M. C. Bowell, when the explosion wrecked the laboratory. It shattered all windows of the fourth floor. One other student was seriously injured, but his condition is not critical.

What He Owes and Owns

It is important that the farmer know what he owes and what he owns, and be in a position to present this information in a business-like way to his banker in case a loan is required. The lender is entitled to a true statement of the financial affairs of the man who would borrow from him.

A Travelling Dental Parlor

Fully equipped as a surgery and a waiting-room, and carrying a dentist and a nurse, a motor dental surgery car is now visiting the 11,000 children in the ninety schools under the Isle of Ely County Council.

Los Angeles salvages about 1,000 tons of tin cans and other metals from its scrap heaps every month.

Clever Speaker Turns Back Pages Of Canadian Political History To The Days Of Macdonald

Wins McKee Trophy

Eastern Pilot Is Given Coveted Award For 1931

Long hours in the air, many spent in patrolling fire-damaged forests in northern Ontario, have brought reward to George H. R. Phillips, pilot and superintendent of eastern flying operations for the Provincial Air Service of Ontario.

Recently he was named the 1931 winner of the McKee trophy, donated by the late J. Daniel McKee, awarded annually for meritorious service for the advancement of aviation in the Dominion. Covering thousands of miles of forest lands, Phillips' log shows he spent more than 770 hours in the air last year. Member of the Provincial Air Service since its organization in 1923, he has been a pilot since 1927.

The Trans-Canada trophy was first awarded in 1927, when it was given to Captain H. A. Oaks, of Toronto. Famed northern pilots have twice won this highest award of Canadian aviation. A first, in 1928, Captain C. H. Dickens, of Edmonton, and a year later by Captain W. R. "Wop" May, also of Edmonton, who recently played an important role in the hunt and capture of the mad trapper of Akavik.

Squadron Leader J. H. Tudhope, pioneer of trans-Canada aerial trails, was the 1930 holder of the trophy. He was a member of the Royal Canadian Air Force in Ottawa until recently when he joined a Pacific coast aviation company.

Depends On Wheat Imports

Figures Show Consumption In Britain Is Five Times Output

Total wheat production of the United Kingdom in 1930, according to the latest figures available, was 22,640,000 cwt., or roughly 42,361,000 bushels, while importations of wheat amounted to 121,069,062 cwt., or 224,152,000 bushels. The year 1930 was, however, a year of low production and was considerably smaller than the five-year average.

Exports of British wheat, and re-exports of imported wheat, during the same year were negligible, amounting only to 1,210,815 cwt., or 2,260,000 bushels in round figures.

Taking into account this export volume, the total consumption of wheat in the United Kingdom in 1930 was 226,152,000 bushels.

Of the re-exported wheat no data is available to show what quantity was Canadian grown.

The Oldest Field Root

The mangel appears to be one of the oldest of our cultivated root crops, states the Agrostologist of the Federal Department of Agriculture. Although exact records are not available the production of the mangel can be traced back as far as 2000 B.C. The evidence of its production at that date is contained on an old plate found in an Egyptian grave. This plate represents a labourer placing a large root on a table as a sacrifice. According to Theophrastus and other writers, roots were common cultivated in Asia Minor as far back as 320 B.C.

Wild Life Sanctuaries

Jasper Park is the greatest wild life sanctuary in all Canada. It is estimated that there are 23,000 mountain sheep within its borders, 7,000 Rocky Mountain goats, 22,000 mule deer, 8,500 elk, 10,000 moose, 10,000 caribou, and 4,000 bear. Banff comes next with 4,000 mountain sheep, 2,000 goats, 5,000 mule deer, 1,500 elk, 150 moose and 250 bear.

Acts Like Thermos Bottle

The Pacific Ocean acts like a great thermos bottle, holding air temperatures along the western coast of America even throughout the year. That is why there are no cold waves or hot spells on the coast. The Pacific states will always be a mecca for tourists and home seekers desiring an even tempered climate, free from thunder storms and tornadoes.

Two Good Walters

"Do you know, John," remarked Mrs. Jagg, as her husband tumbled upstairs, "that I've been awake for hours waiting for you to come home from the club."

"If that isn't just like a woman!" growled Jagg. "And I have been at the club for hours waiting for you to go to sleep."

Outlived Them All

Oldest Inhabitant (to district visitor): "I'm ninety-four, and I haven't got an enemy in the world."

District Visitor: "That is a beautiful thought."

Oldest Inhabitant: "Yes; thank God, they are all of 'em dead long ago!"

Mountain Guide—"Be careful not to fall here. But if you do fall remember to look to the left. You get a wonderful view."

Dad—"When I was a little boy your age I didn't fall here."

His Son—"Where were you when you started, Dad?"

Turning back the pages of Canadian political history to the days of Macdonald, Tilley, Tupper and Blake, R. B. White, veteran Conservative member of the House of Commons, recently spoke before the Canadian Club of Ottawa.

Mr. White, who sat in the parliamentary press gallery a half century ago and looked down from that vantage point on the political giants of the period, gave it as his considered opinion that the average ability of the House of Commons today is as high as it has ever been.

Fifty years from now, he said, people will be talking of the political giants of today, just as we now do of those who trod the political stage in 1882.

Mr. White, who knew politics and statesmen not only as a journalist, but also as a member of the House of Commons, told the Canadian Club that he was "degraded" from the press gallery to a seat on the floor of the House in the year 1888. He represented the Ontario constituency of Cardwell.

At present he represents Mount Royal. Mr. White delighted his listeners with many anecdotes of political figures who have passed into history. Just in passing, he expressed the view that "one of the vices of our House of Commons" is the long speech.

People might agree or disagree with the policies of Sir John A. Macdonald, but all must admire his talents. Mr. White said, Sir John, in his opinion, was "the daddy of them all." The old Conservative leader was not what would be called a good speaker. It was his personal popularity which was his great asset. Mr. White told Sir John would come back and gossip with the "back benchers" when quiet reigned in the House of Commons.

It had been his pleasure and privilege to know Sir Wilfrid Laurier well. "A charming man and a great orator," he called Sir Wilfrid. He spoke of Sir Charles Tupper who had "actually foamed at the mouth" in the course of one of his fiery exhortations to the House of Commons.

He referred to Sir Leonard Tilley, Hon. A. Mackenzie, Sir John Thompson, Hon. William Patterson, Sir Richard Cartwright and others who stand out from the pages of political history. He quoted Hon. William Patterson as saying once, when dealing with the question of patronage, that "all other things being equal, a Liberal should have the job."

"And," added Mr. White to the amusement of his audience, "all other things being equal, and the Liberal got the job."

Speaking of Hon. Edward Blake, Mr. White said that in power and in respect to pure intellect no able man ever sat in the House of Commons. Sir Richard Cartwright, he said, was frequently very sharp and bit at parliament. "I almost think he disliked Conservatives," said Mr. White, "and that he regarded them as a different breed of dog altogether."

Farmers Will Benefit

Trading In Hogs On the Basis Of Official Grades

The new hog grading regulations put into effect by promulgation in the "Canada Gazette" of January 30 extended the provisions for trading in hogs on the basis of official grades in such a way as entirely to eliminate flat-price trading. Hogs sold from farmer or other producer right down the line to the final packer or processor must be traded in on the basis of official grades. This ensures to the farmer full benefits of the agreement with the packing industry whereby a premium of one dollar is paid for all hogs grading "Select Bacon." The regulations also provide for that premium for quality, which is rightly his, passing back in larger measure to the original producer. Complete information as to grades and the procedure to be followed can be secured on application to the Department at Ottawa.

Hostess: "Then you managed to get here tonight, after all?"

Absent-Minded Professor: "Yes, I meant to forget to come, but I forgot to forget it."

France buys more than she sells to China.

"What are you looking for, miss?"

"They told me that an old sea dog was to be found on this pier, but I can't see it anywhere."—Nagels Lustige Welt, Berlin.

VARIETY ENTERTAINMENT

By local talent and Lacombe artists in Bentley Community Hall, on Tuesday, March 22. The United Church Quartette, in Duet and Solo Numbers. There will be Readings, Instrumental and Novelty Acts; Lyrics by Damron & Thorpe, also by request a revival of the one act farce, "Packing Up" which has the following cast: John Chugwater, Frank Thorpe, Mary Chugwater, Bella Whitworth. There will be an impromptu dance following the concert with local music. Admission 50c. and 25c. No one should miss this entertainment as it will be well worth your time and money.

Mr. O. J. Johnson is a patient in the hospital. He underwent an operation on Saturday last, and is doing fine.

Mrs. Fred Carrit is a patient in the hospital.

Louis Gyori is a patient in the hospital.

The young people had a costing party at Hutton's field on Sunday and report a good time.

Mr. Kenny of the Bank of Montreal staff returned from his holidays on Sunday.

The Bentley Hockey Team won the Commercial Hockey League.

Mary Kent was a visitor at the home of Dr. and Mrs. Henry, over the week end.

The funeral of Mr. Carl Thomas was held from the United Church, on Saturday last.

There will be a Whist Drive and dance at the Bentley Community Hall on April 1st, proceeds for the Hospital Fund. Music for the dance will be supplied by the Star 5-piece Orchestra.

The Star 5-piece Orchestra will play for the dance on April 1st.

The Board of Trade will meet on March 28th. Mr. John MacDonald, of Lacombe will be in attendance.

The Board of Trade have called the meeting to see what can be done to beautify the town by planting trees and shrubs.

The winning rinks in the Spicelined up as follows: Grand Challenge: Skip, R. Garries; 3rd, H. Damron; 2nd, R. Garries; Lead, Mrs. Wetherill.

Consolation, Skip, H. Thorpe; 3rd, C. F. Damron; 2nd, W. Thorpe; Lead, Mrs. W. Thorpe. Leap Year Special, Skip, H. Brownlee; 3rd, Mrs. McDougall; 2nd, Chas. Garries; lead, A. Hansen.

Mrs. Haise and Daughter spend the week end at the home of Mr. and Mrs. Summers.

Two rinks are going to Sylvan Lake to try and lift the Imperial Bank Cup. The skips are Frank Hewitt and W. F. Pringle.

The Curkies announced attended Divine Service in the United Church on Sunday night last. Their choir gave quartette and anthem renditions that

were much enjoyed, while Rev. W. J. Moores preached a sermon with the science of Curling as his theme throughout, as translated into our every day life.

The mixed hospital came to a close on Saturday night under ideal curling conditions with Ralph Garries, Harry Brownlow Jr. and Bert Thorpe, winning the Grand Challenge, Leap Year Special and Consolation events, respectively.

Having been granted an extension of five years over and above the two years yet to go on their town lighting franchise, Messrs. Thorpe Bros. announce a new low rate of 20 cents per K.W. with 10 percent discount for payment of bills on or before the 10th of the following month, as now in effect.

Mrs. Bea Kirkham, who has been staying with her sister, Mrs. Chas. McDougall, during the winter months, left on Sunday to visit with her father at the old home farm near Ridgewood.

Twenty-six tables of Whist were filled at Mr. and Mrs. H. P. Hansen's on Friday night last, in a drive given in aid of the Bentley Hospital.

Mr. Hansen's commodious house provided plenty of room for the large crowd that attended an enjoyable evening was spent. Nearly \$400 was raised for the fund. The closing Drive of the year for the Hospital will be held in the Community Hall on April 1st when the winners throughout the series will compete separately for a Grand Prize.

There will be Whist Drive and Dance in the Bentley Community Hall on Friday, April 1st. Proceeds from this dance will go to the Hospital Fund. Music for the dance will be supplied by the Star 5-piece Orchestra.

A MARKET FOR GREENFEED

There is a good demand for greenfeed in different parts of the Province, and the government has taken steps to have the demand supplied wherever possible. The relief division of the Alberta department of agriculture would like to get in touch with farmers having an overabundance of feed in this district, who are willing to sell same at a reasonable price. \$4.00 per ton is being paid, and while this is a pretty low figure, it is about all the needy farmers of the province can afford to pay, and is better than letting a lot of feed go to waste. Information can be obtained by writing to S. H. Gaudier, Relief Division, Department of Agriculture, Edmonton, or E. G. Wood, Hanna, Alberta.

C. F. DAMRON Auctioneer JESSE FRASER, Clerk

You'll Soon Start Work on the Land

We have never been able to quote lower prices on work shoes. We were fortunate in being able to take advantage of a factory price on our line of Work Shoes for Spring and can save you at least 15 p.c. of regular retail price.

Black Mennonite grain Blucher cut, with outside counter, rubber heels, plain or with toe caps, sizes 6 to 11, Selling now at **\$2.75**

Men's tan Elk Blucher cut, with outside counter, plain toe, sizes 6 to 11. See it at **\$3.25**
A full line of Miner's laced rubbers, also dress and work rubbers, now in stock at lower prices.

That New Hat

We have just opened up our new stock of Dress Hats in all new shapes and shades; greys, browns and blacks. Priced from **\$2.50 to \$7.00**
Come in and see our Lord Biltmore High Grade Hat, packed in individual travelling box. Something really new and up-to-the-minute.

FOR YOUR NEW SPRING SUIT

Come in and let us fit you to a new suit, made-to-measure, by W. R. Johnston & Co. or by Burton. We have the swellest line of samples it has ever been our pleasure to show, and the prices are away down.

Fred Dobirstein

Railway Street Lacombe
Agent for CANADIAN WILD BOAR PLOW SHARES

FARMERS

You will save Time, Trouble and Money by Using only Wild Boar Plow Shares. An entirely new idea has produced this all-hardened, self-sharpening Plow Share that has been thoroughly tested and tried under all conditions. These shares are particularly adapted to heavy and stony land.

It will last twice as long as any soft plow share manufactured.

The next time you are in town drop around and see them. We have them for any make of Plow, also for Breaker plows.
